2023 - Present

CGPA: 3.13

Muhammad Shozab

Software Engineering Student | Full-Stack Developer

PROFILE

A Software Engineering student at Air University, Islamabad, specialising in full-stack MERN development, technical SEO architecture, and creative UI engineering. I build performant, semantically structured web applications with obsessive attention to Lighthouse scores, schema markup, and Core Web Vitals. My work spans production-grade MERN apps, programmatic SEO platforms, custom WordPress builds, and interactive JS experiences.

EXPERIENCE

Freelance SEO Specialist

Self-Employed | 2023 - Present

- Audited and optimised 40+ websites across Tool based, SaaS, and content niches with measurable ranking lifts.
- Moved multiple keywords from page 5+ into top-3 Google positions through technical SEO and content engineering.
- Delivered Core Web Vitals improvements and all-green Lighthouse scores across client portfolios.

Full-Stack MERN Developer

Personal and Academic Projects | 2025 - Present

- Shipped MERN applications with JWT auth, REST APIs, and scalable MongoDB schemas serving real users in production.
- Built a Spotify Web Player clone with pure HTML, CSS, and Vanilla JS featuring full playback and dual search.
- Engineered an AI murder mystery game using Minimax, A*, and constraint satisfaction for dynamic storytelling.
- Developed SmartTransit: a C++ and Vanilla JS transit planner with Dijkstra, DFS, and interactive Leaflet maps.

WordPress Engineer

Freelance Clients | 2024 - Present

- Built custom WordPress and headless CMS sites with Core Web Vitals in the green across all categories.
- Developed Kadence Blocks, Blogging Sits, and ACF-powered templates for client content model.

SELECTED PROJECTS

Spotify Web Player Clone

2025

Pure HTML/CSS/Vanilla JS. Full playback, queue, dual search, keyboard shortcuts, zero frameworks.

Shadow Detective - AI Murder Mystery

2025

Interactive detective game using Minimax, A*, constraint satisfaction, and probability scoring.

Space Shooter Ultimate Edition

2025

C++/SFML OOP arcade shooter: two levels, six enemy types, eight power-ups, particle effects, boss battle.

SmartTransit - Bus Journey Planner

2025

Dijkstra and DFS transit planner with Leaflet map, side-by-side route comparison, and saved routes.

Inventory Management System

2025

C# WinForms desktop CRUD app with role-based access, product management, and relational SQL backend.
